PROGRAM ADMINISTRATION
v. 1 9/6/2022

1. Applicability and penalties for violating these rules

Unless otherwise specified, the following rules apply to all assignments.

If these rules are changed, new rules and their effective date will be posted and announced in class.

There will be a penalty of up to 10 points for *each* rule violation.

2. Coding style

You must follow the coding style guide on the course web page.

4. Submission of single files on turing/hopper

Name your main program `Hwn.java`, where `n` is the assignment number. Download that file to your PC. Then upload it to Blackboard.

You will lose points if your program does not compile and run on turing/hopper.

5. Submission of packages on on turing/hopper

If you have multiple files to submit, i.e., a main program and one or more classes, name your main program `Hwn.java`, where `n` is the assignment number. Place it and any additional source files you create in a directory named `Hwn`. Do not put other files in that directory.

Zip up that directory to create `Hwn.zip`, where `n` is the assignment number. Remember that Java is case-sensitive. `Zip` is available on turing/hopper.

Download the zip file to your PC. Then submit the zipped file on Blackboard.

Do not submit extra files (object files, test files, or any other files). Do not use an incorrect subdirectory structure, use a different compression program, or name your files differently.

You will lose points if your program does not compile and run on turing/hopper.

6. Submission of assignments on IntelliJ

New submission instructions will be provided when we switch to the IntelliJ IDE.

7. Extra credit and late penalties

You will receive 10% extra points (rounded) for assignments submitted 24 hours before the deadline.

There will be a penalty of 10% (rounded) for each day or portion of a day for late programs.

No programs will be accepted more than two days late. I suggest you submit your assignments by 11:58 PM to make sure they are received on time.

In general, there are no waivers of the late penalty or extensions beyond this period. No programming assignments may be submitted after the last day of classes.

If you resubmit, the submission time will be the latest one, and I will ignore any earlier submissions.
